

The new handgrip generation

Childs play to operate

Patent pending

Ergonomically formed grip extensions in various designs can be easily attached. These enable completely new support positioning.

Each operator can find one that helps him conserve energy and increases operational safety.

A small addition but to great effect

For instance a simple lever mechanism at the trigger of our new blasting guns makes them child's play to operate. The operator can use the gun without feeling strain and bodily stress which enables longer, more concentrated working periods.

No real strength required to grip the trigger

Compared with conventional guns over 80% less strength is required to operate and hold the trigger.

An advantageous side effect is greatly reduced valve component wear.

SP 1000 M

Mechanical dry shut off

Op. pressure: 1000 bar
Flow rate: 30 l/min
Weight: 3,8 kg

SP 1000 ME

Mechanical dry shut off / Electric

Op. pressure: 1000 bar
Flow rate: 30 l/min
Weight: 4,4 kg

SP 3000 E

Electric

Op. pressure: 3000 bar
Flow rate: 30 l/min
Weight: 3,5 kg

SP 3000 MB

Mechanical bypass (dump)

Op. pressure: 3000 bar
Flow rate: 30 l/min
Weight: 3,7 kg

SP 3000 MBE

Mechanical bypass / Electric

Op. pressure: 3000 bar
Flow rate: 30 l/min
Weight: 4,3 kg

SP 3000 MB – 2H

Mechanical bypass for two hand operation

Op. pressure: 3000 bar
Flow rate: 30 l/min
Weight: 6,2 kg
